

game
parallel paths

how to play

minimum duration

10 min.

minimum number of players

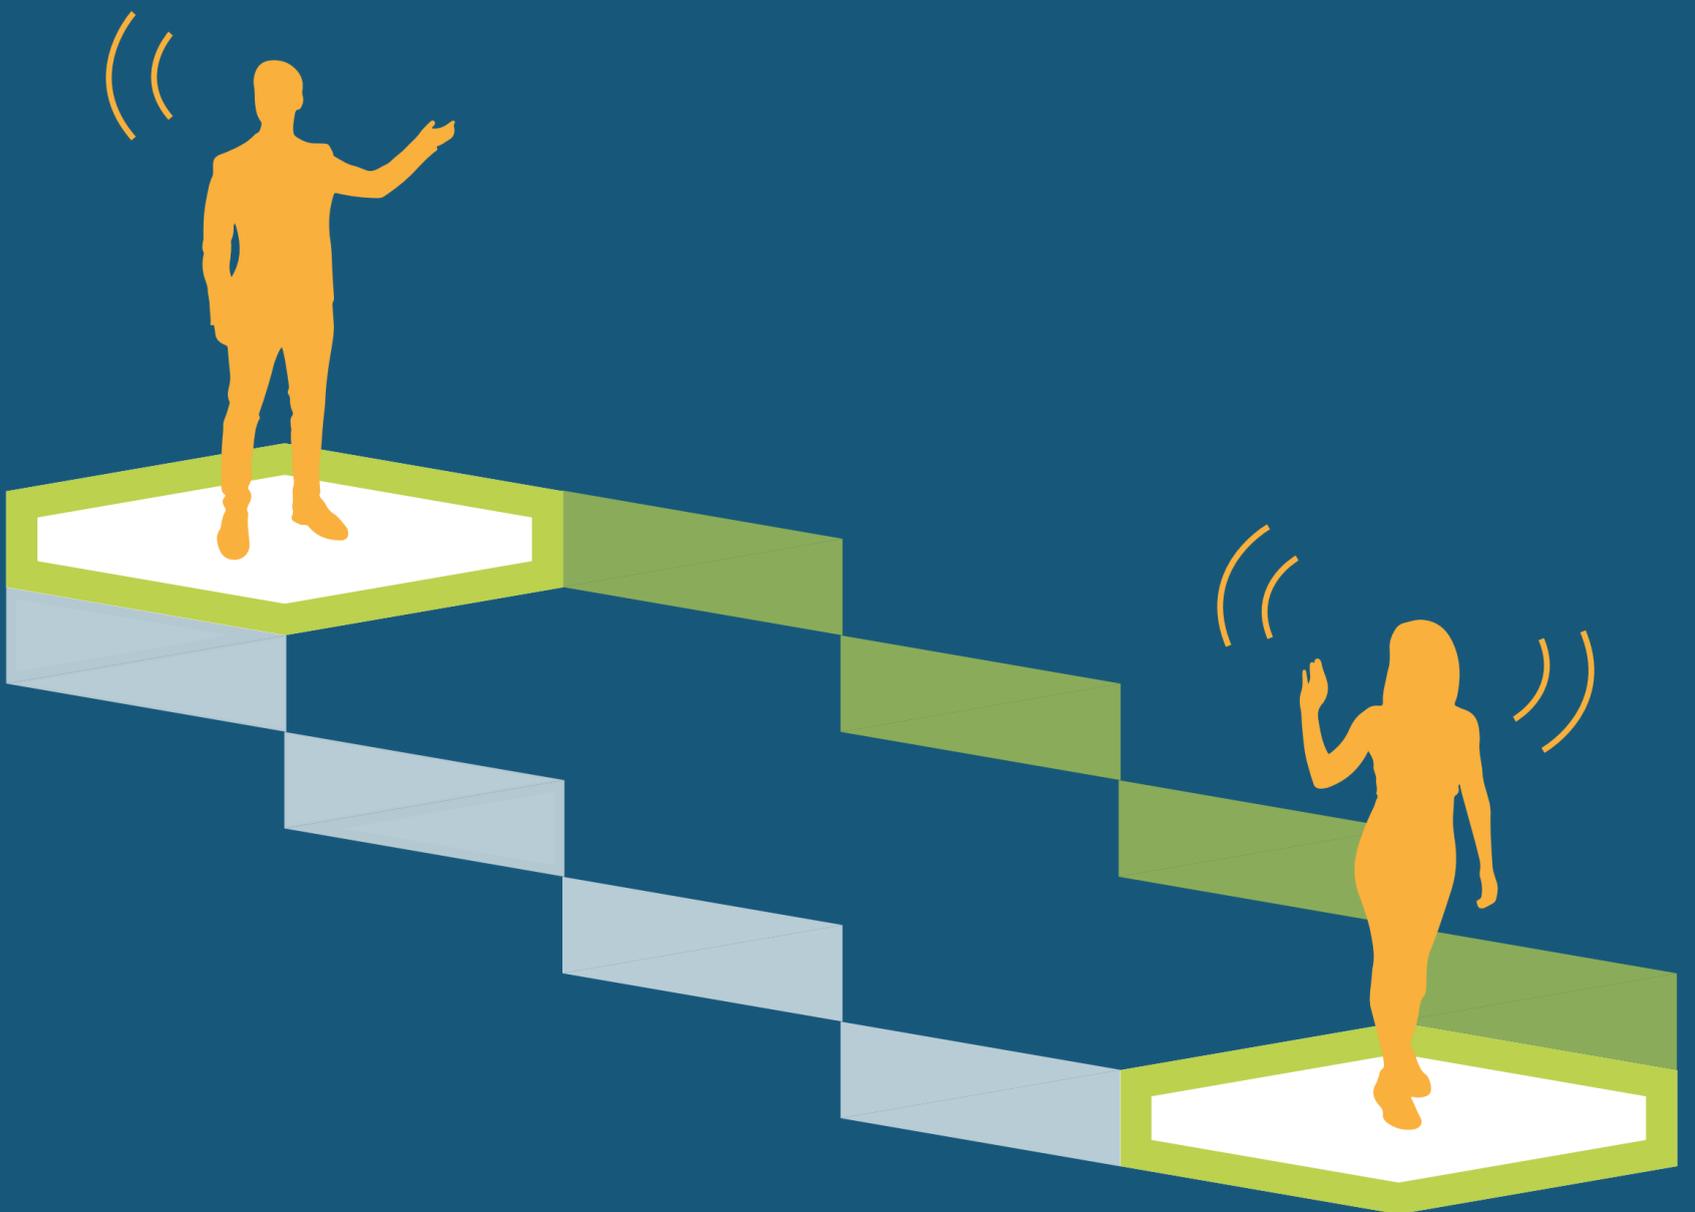

2 people

basic rules

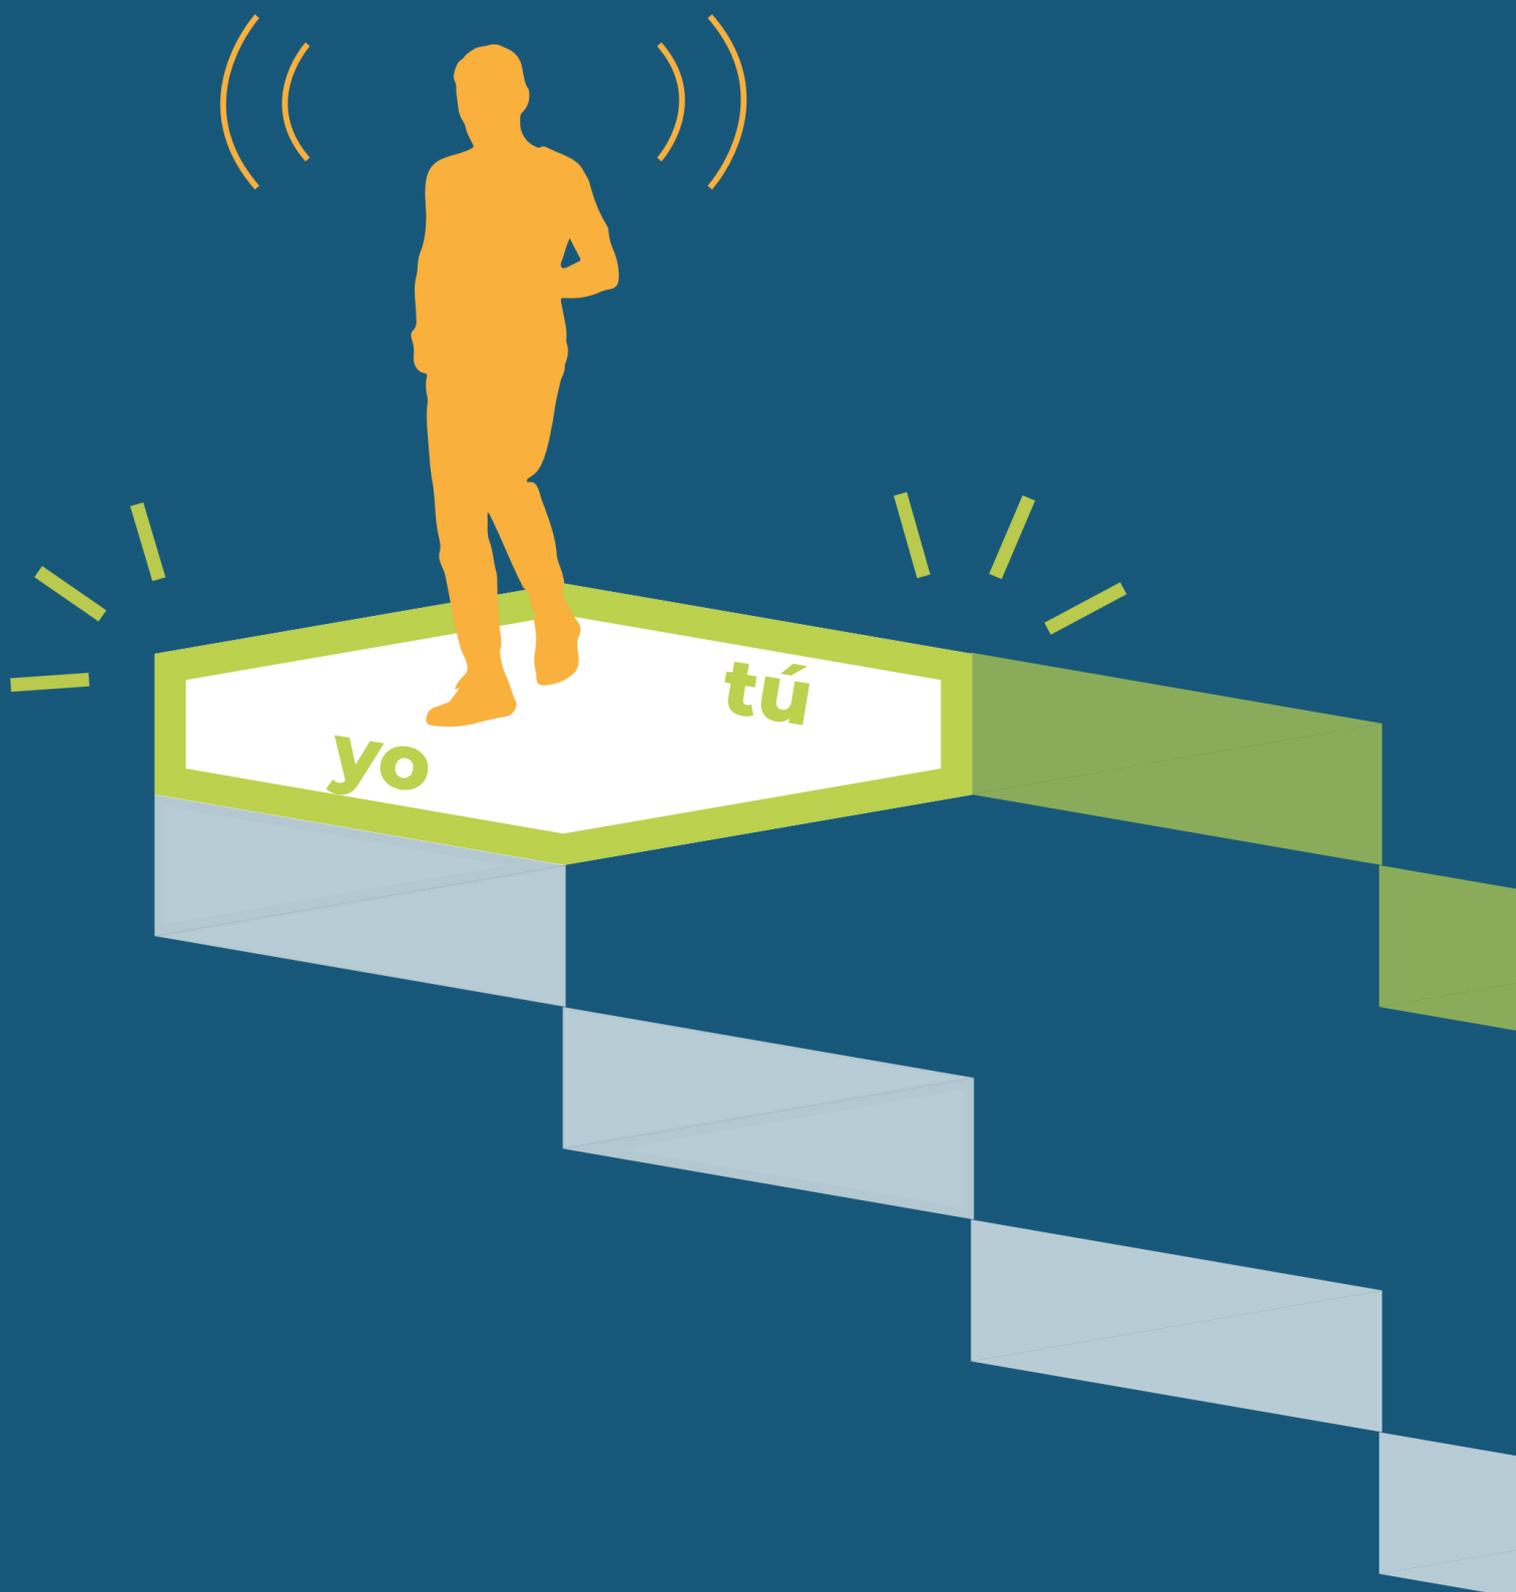

objective of the game:

get to know the other person who is playing with you as you complete the round, going through the two **superhouses**.

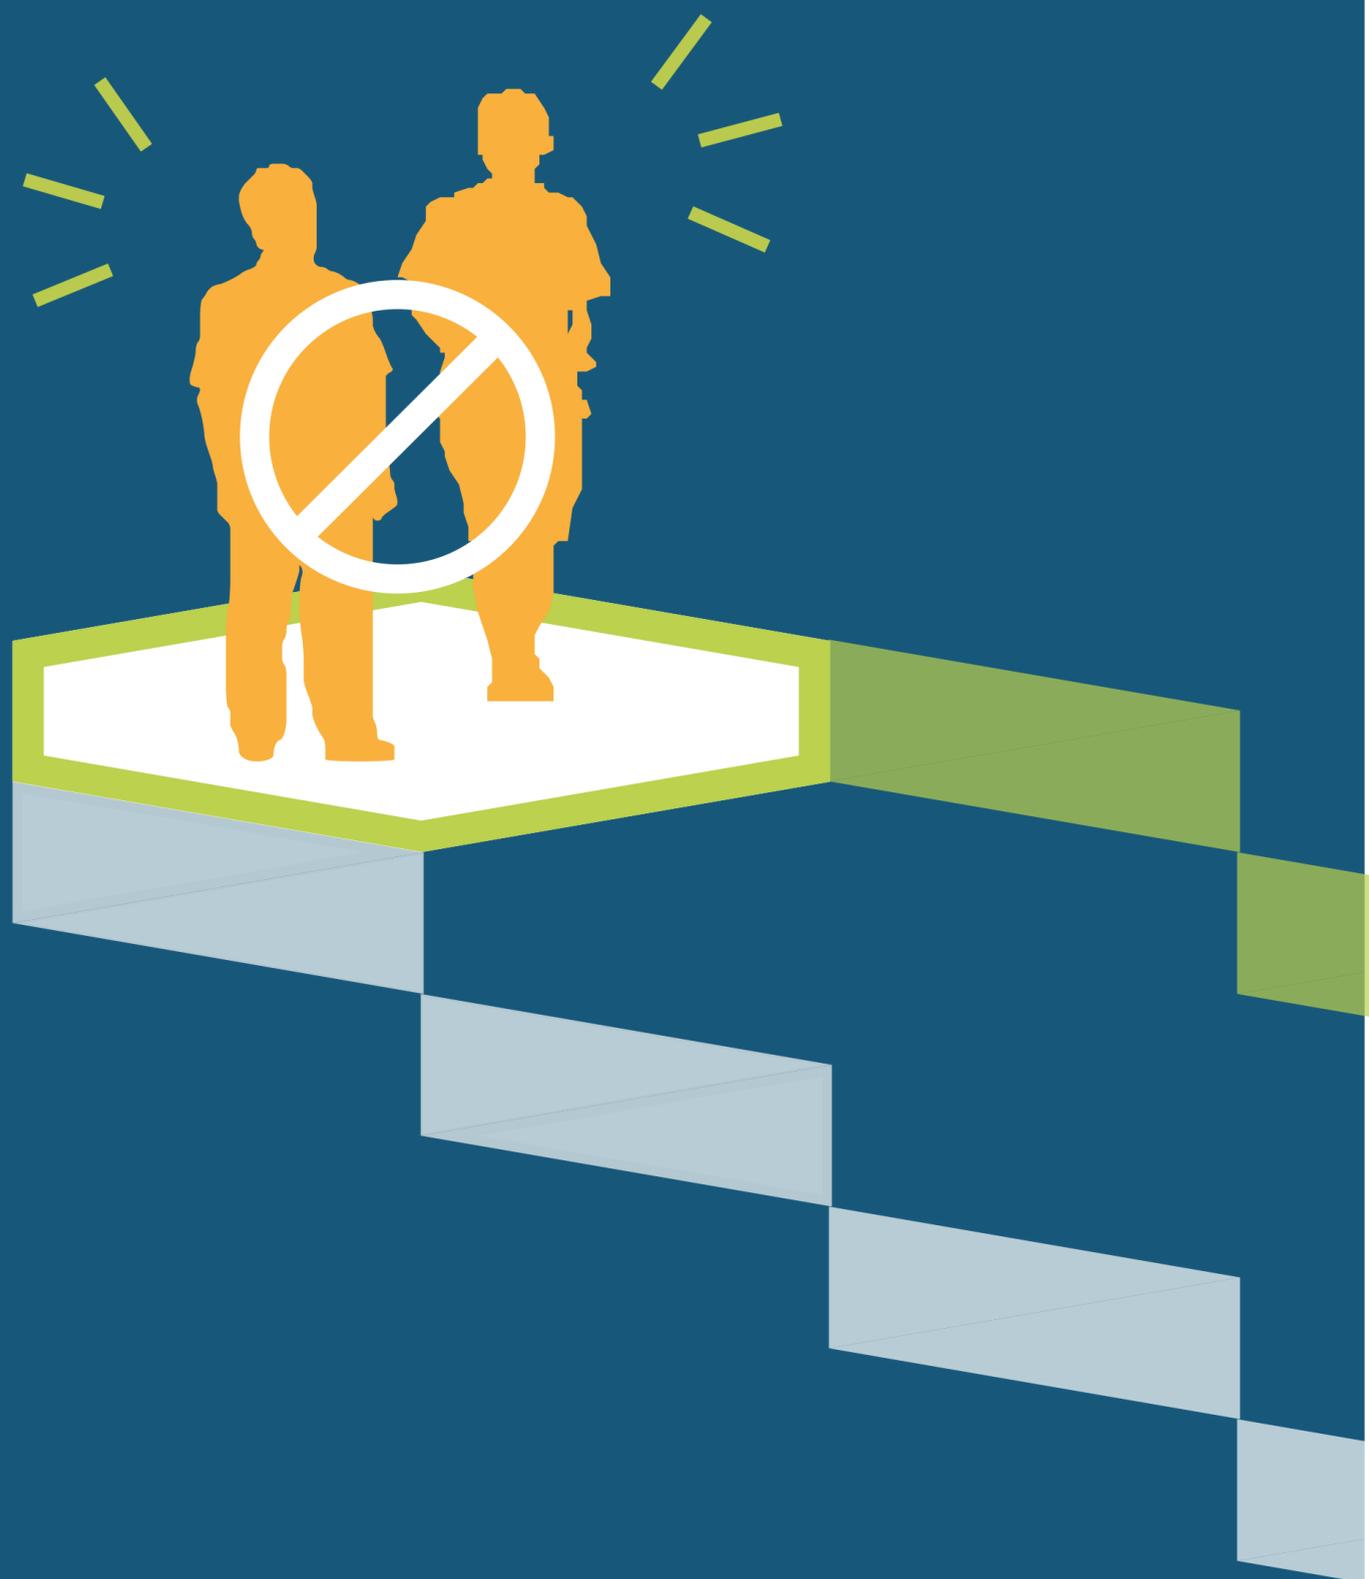

basic rules

superhouses are the hexagons with the edge highlighted. on each one are written ME and YOU, indicating the two possible paths.

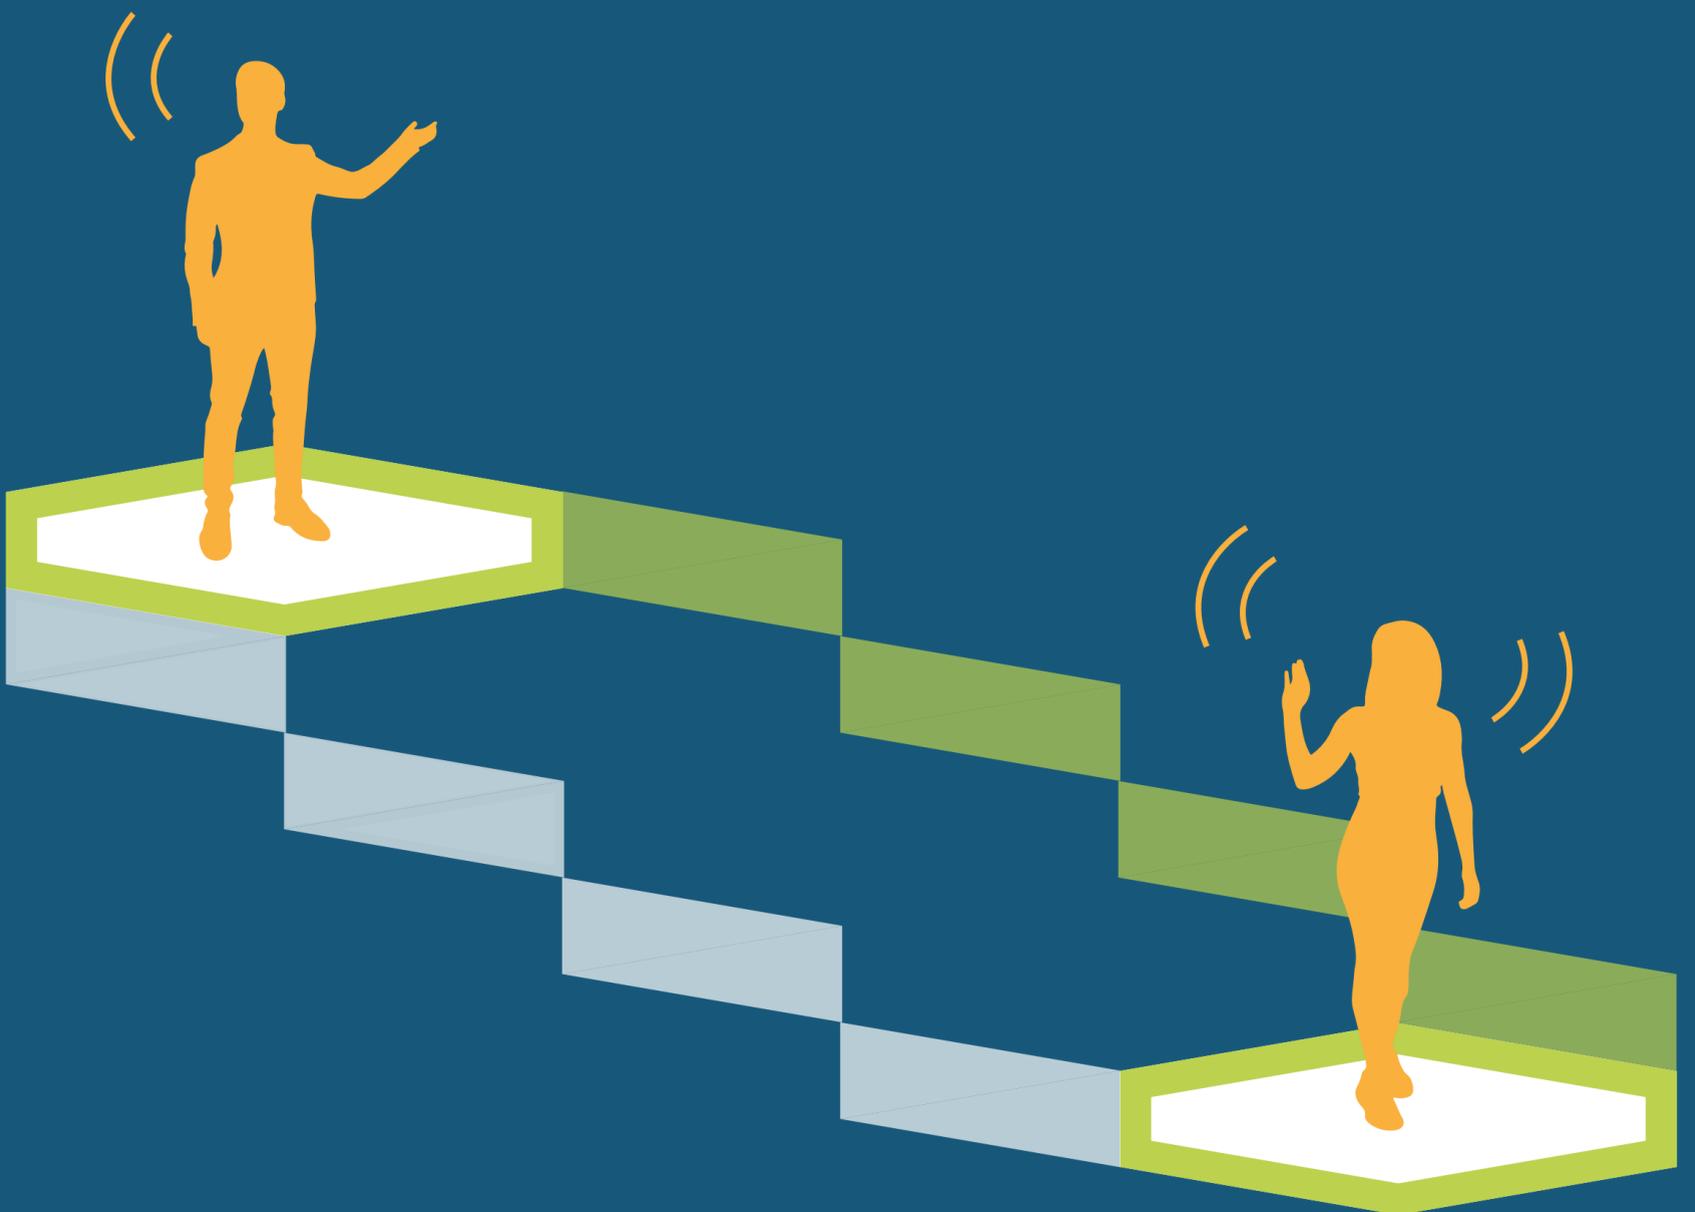

basic rules

before you start, attention: two people can never occupy the same house!

step 01

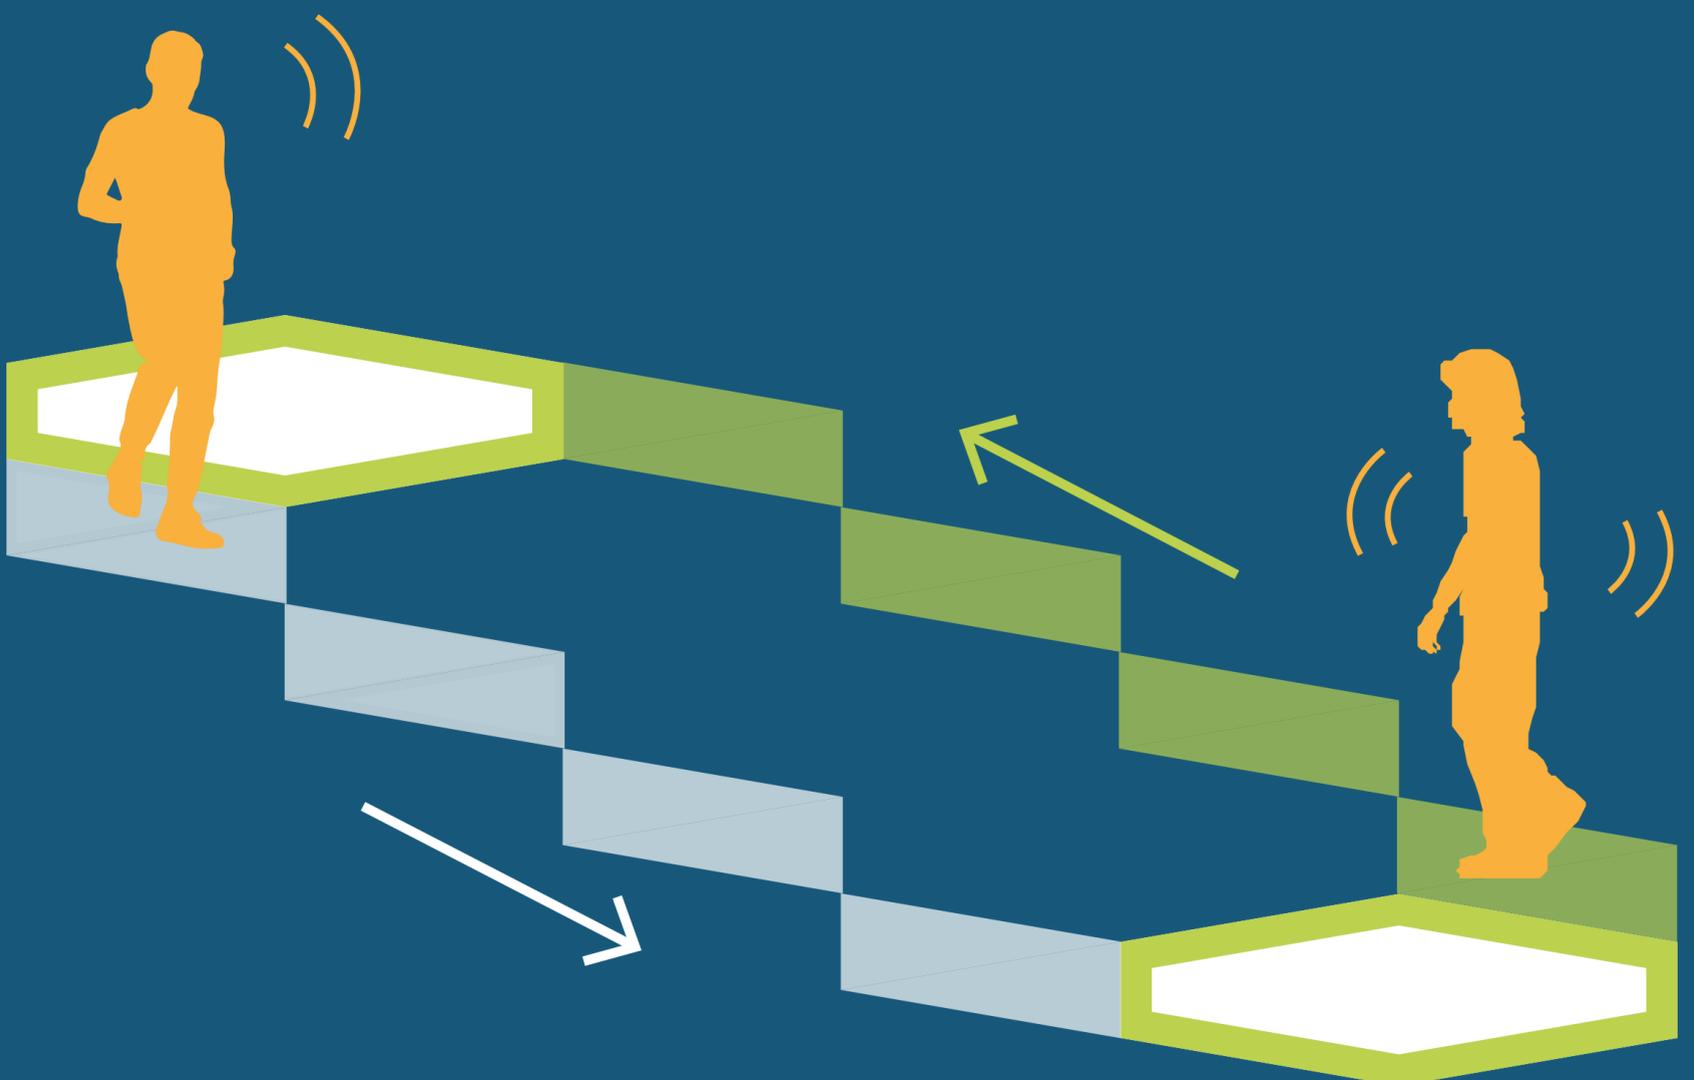

to start the game, each person stands in the center of one of the two **superhouses**.

step 02

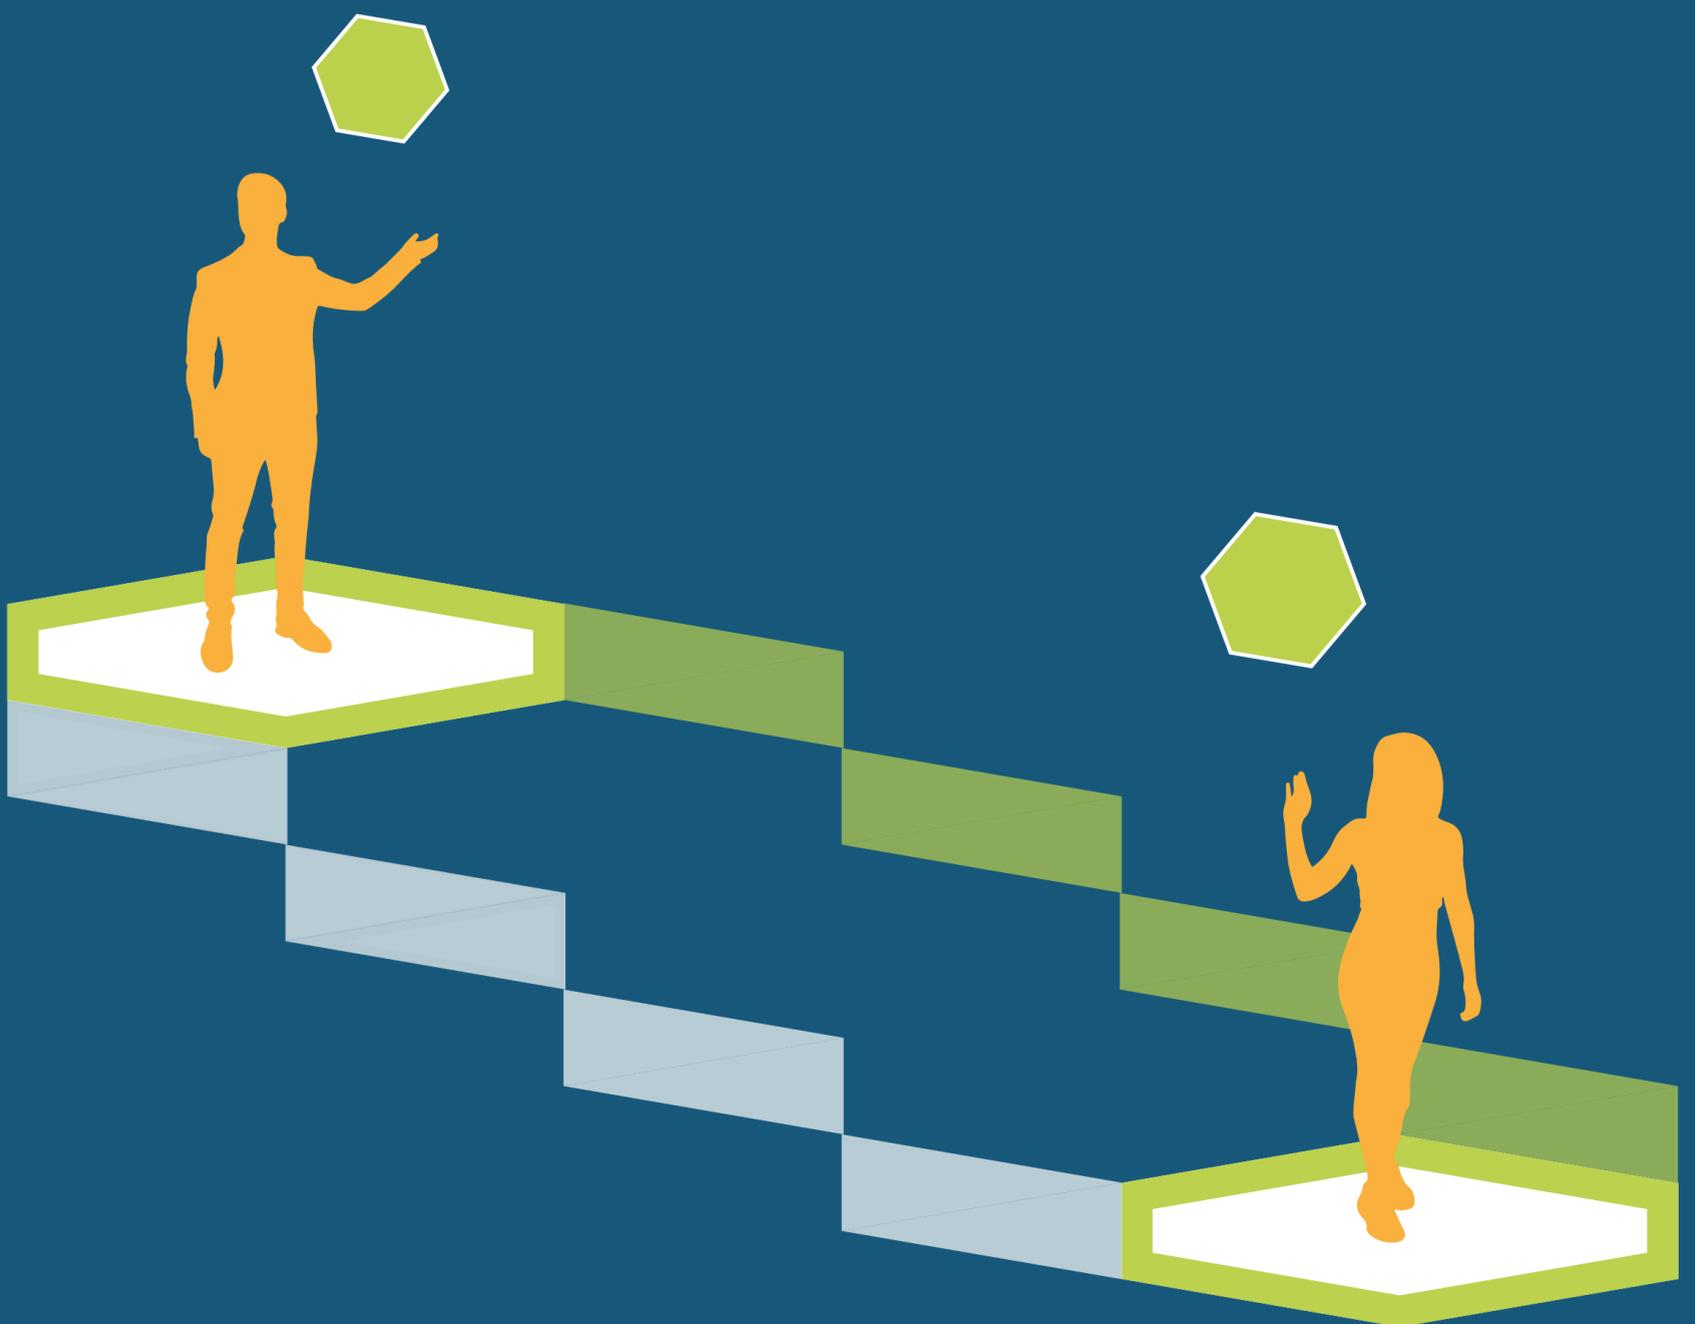

in this game, the two people
move at the same time, walking
in opposite directions

You will see on the ground the
indication of your one-way path:
the path of the "ME".

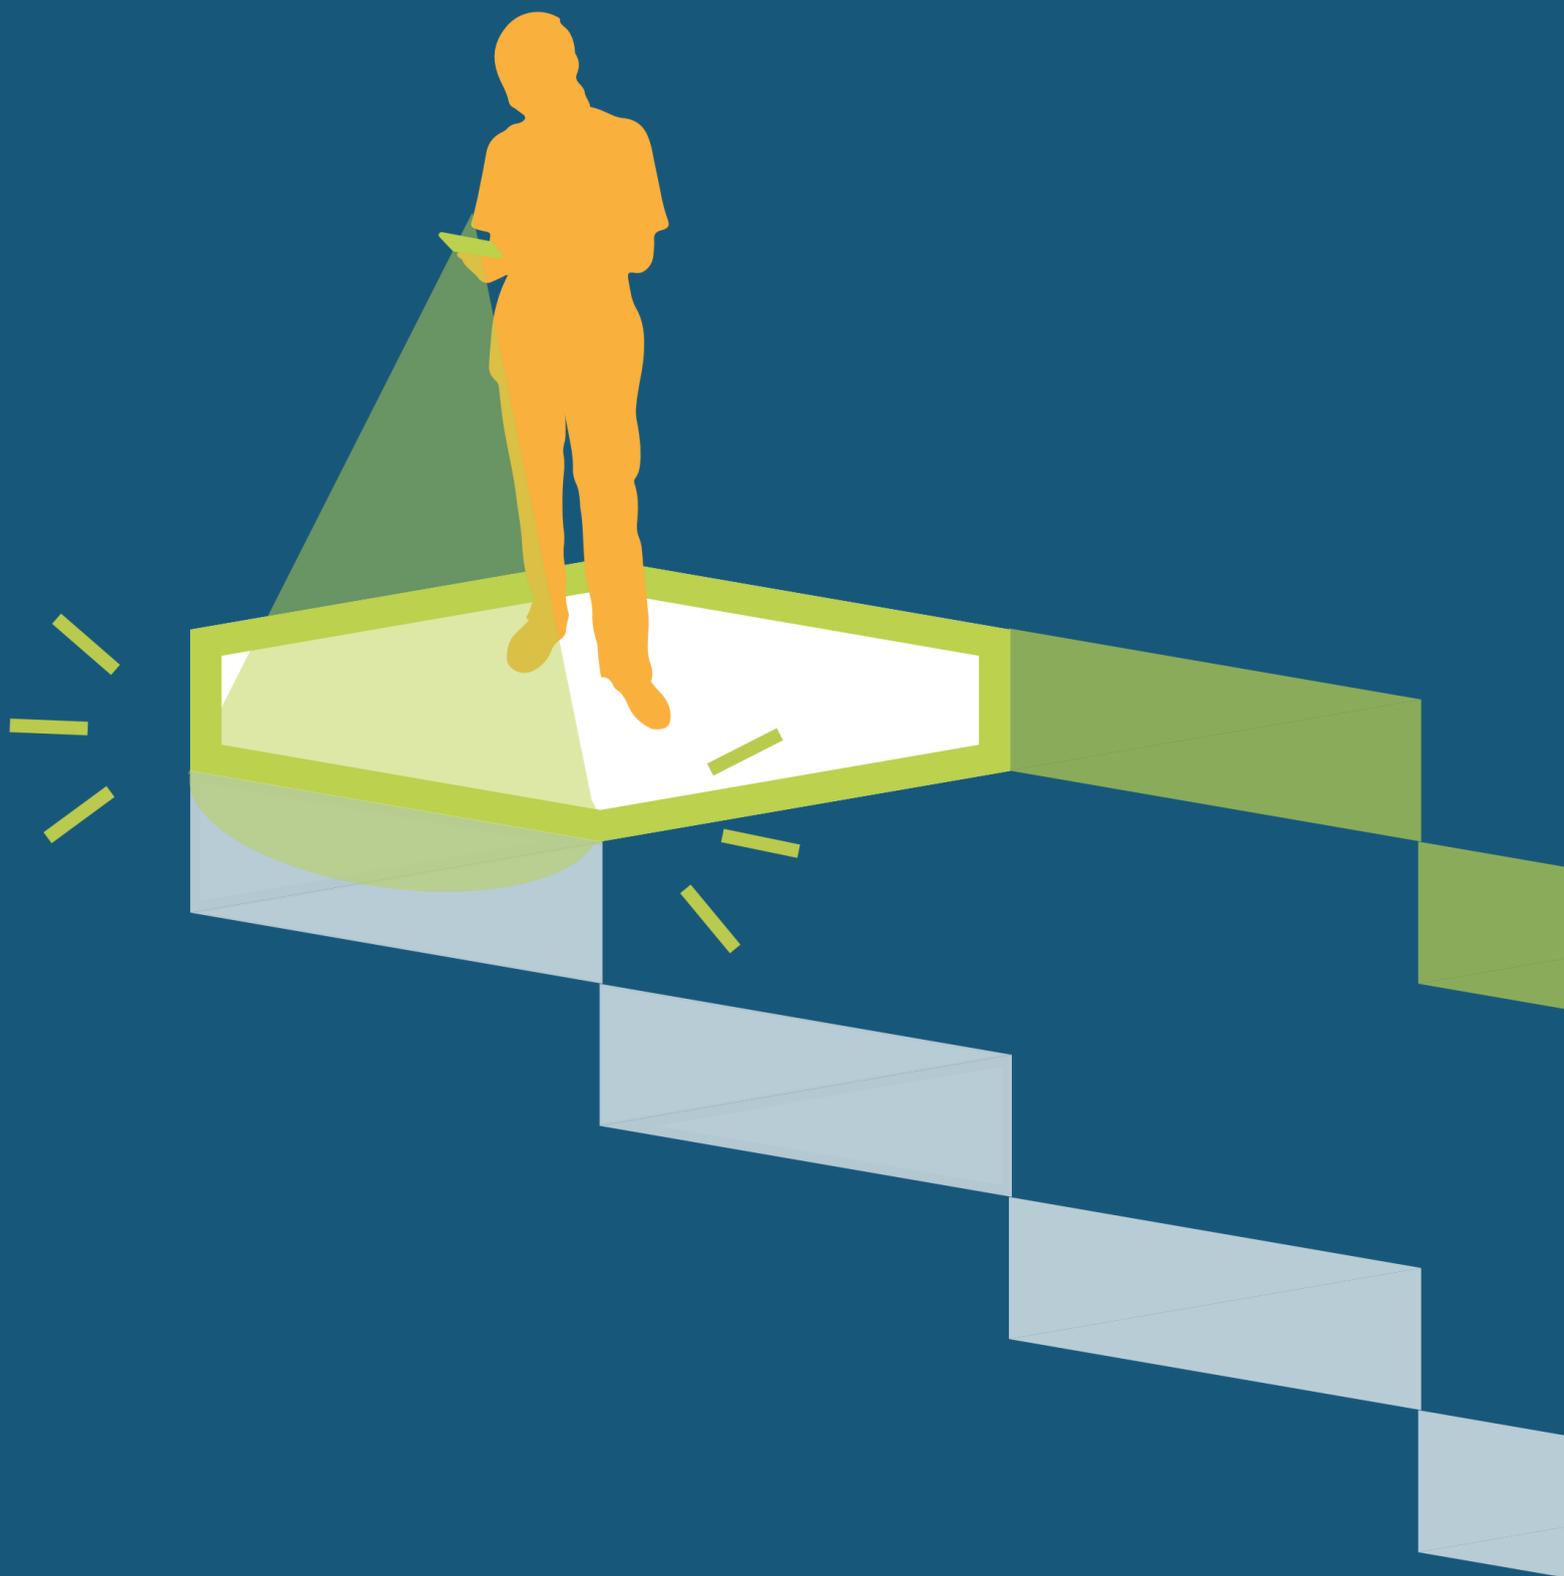

step 03

before you start walking, you can select in the application whether you want to play with one of the themes that appear on the screen, or whether you will play without a specific theme.

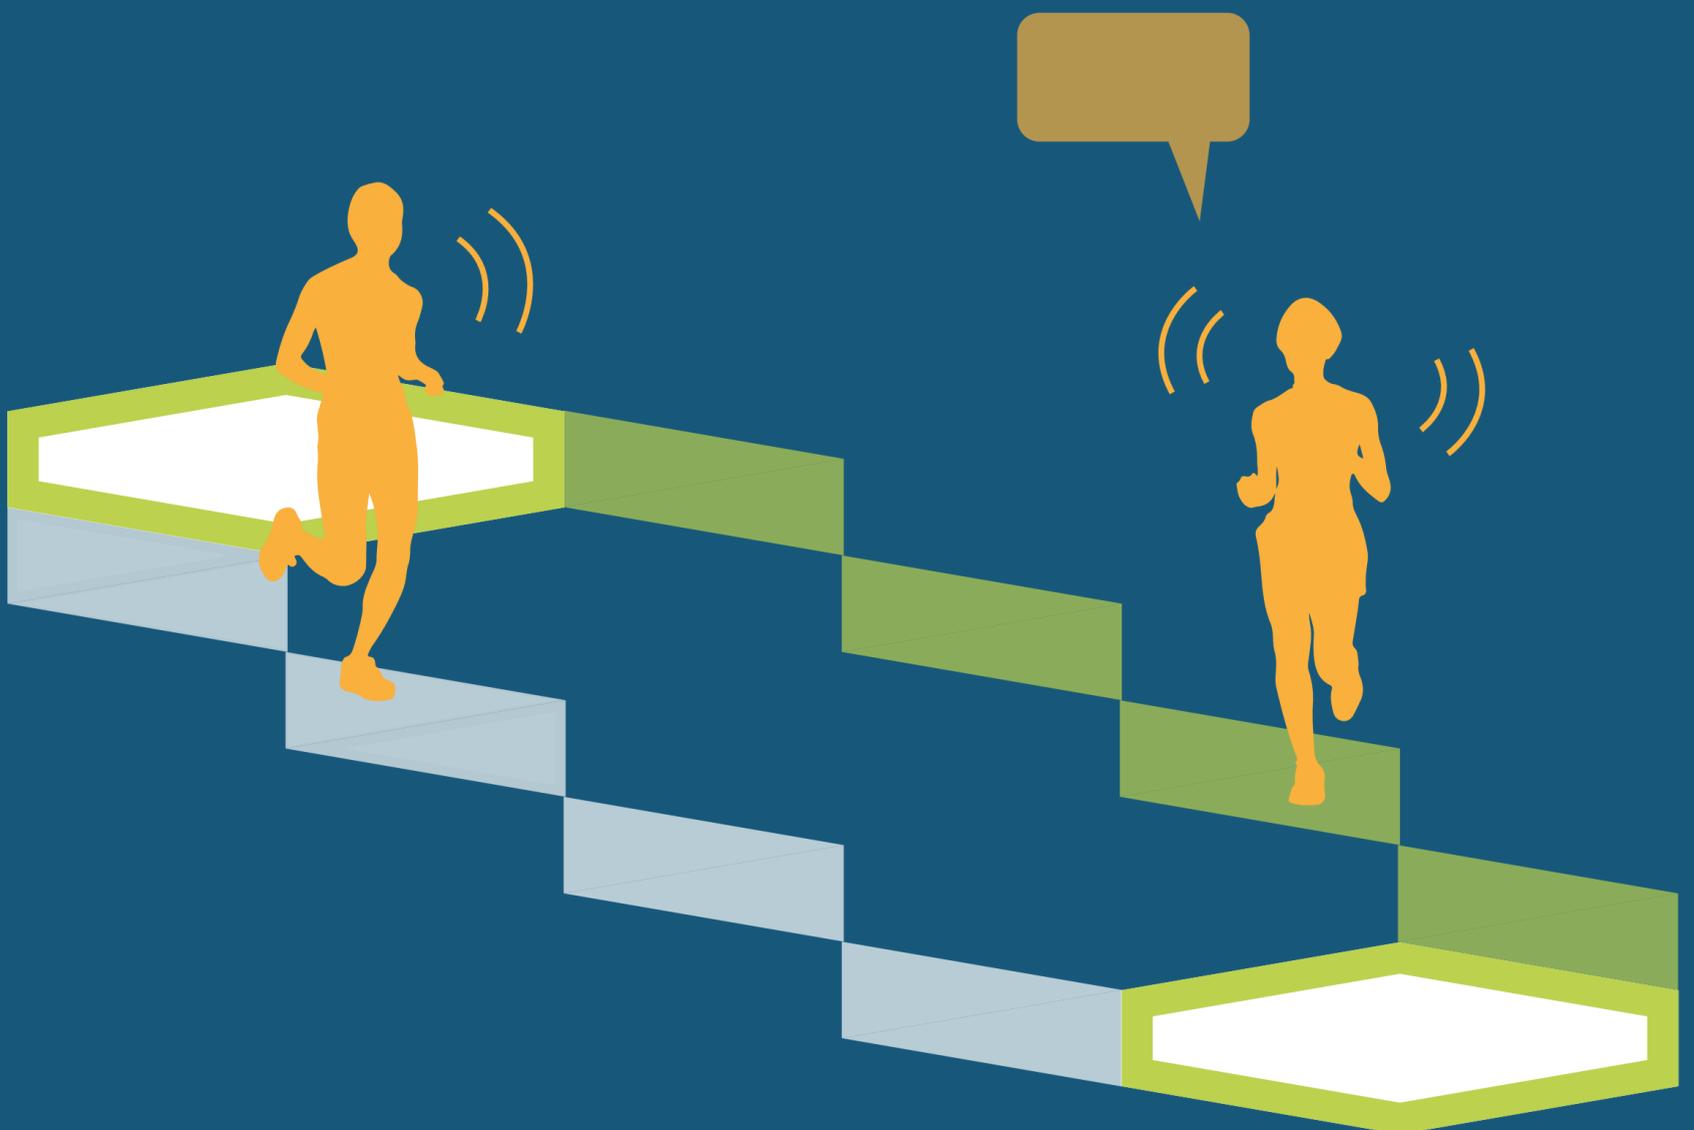

step 04

if you want, you can use the application to randomly draw a challenge for how to cross the bridge: point your cell phones at the superhouses you are in. the application will draw four actions for you to do along the way!

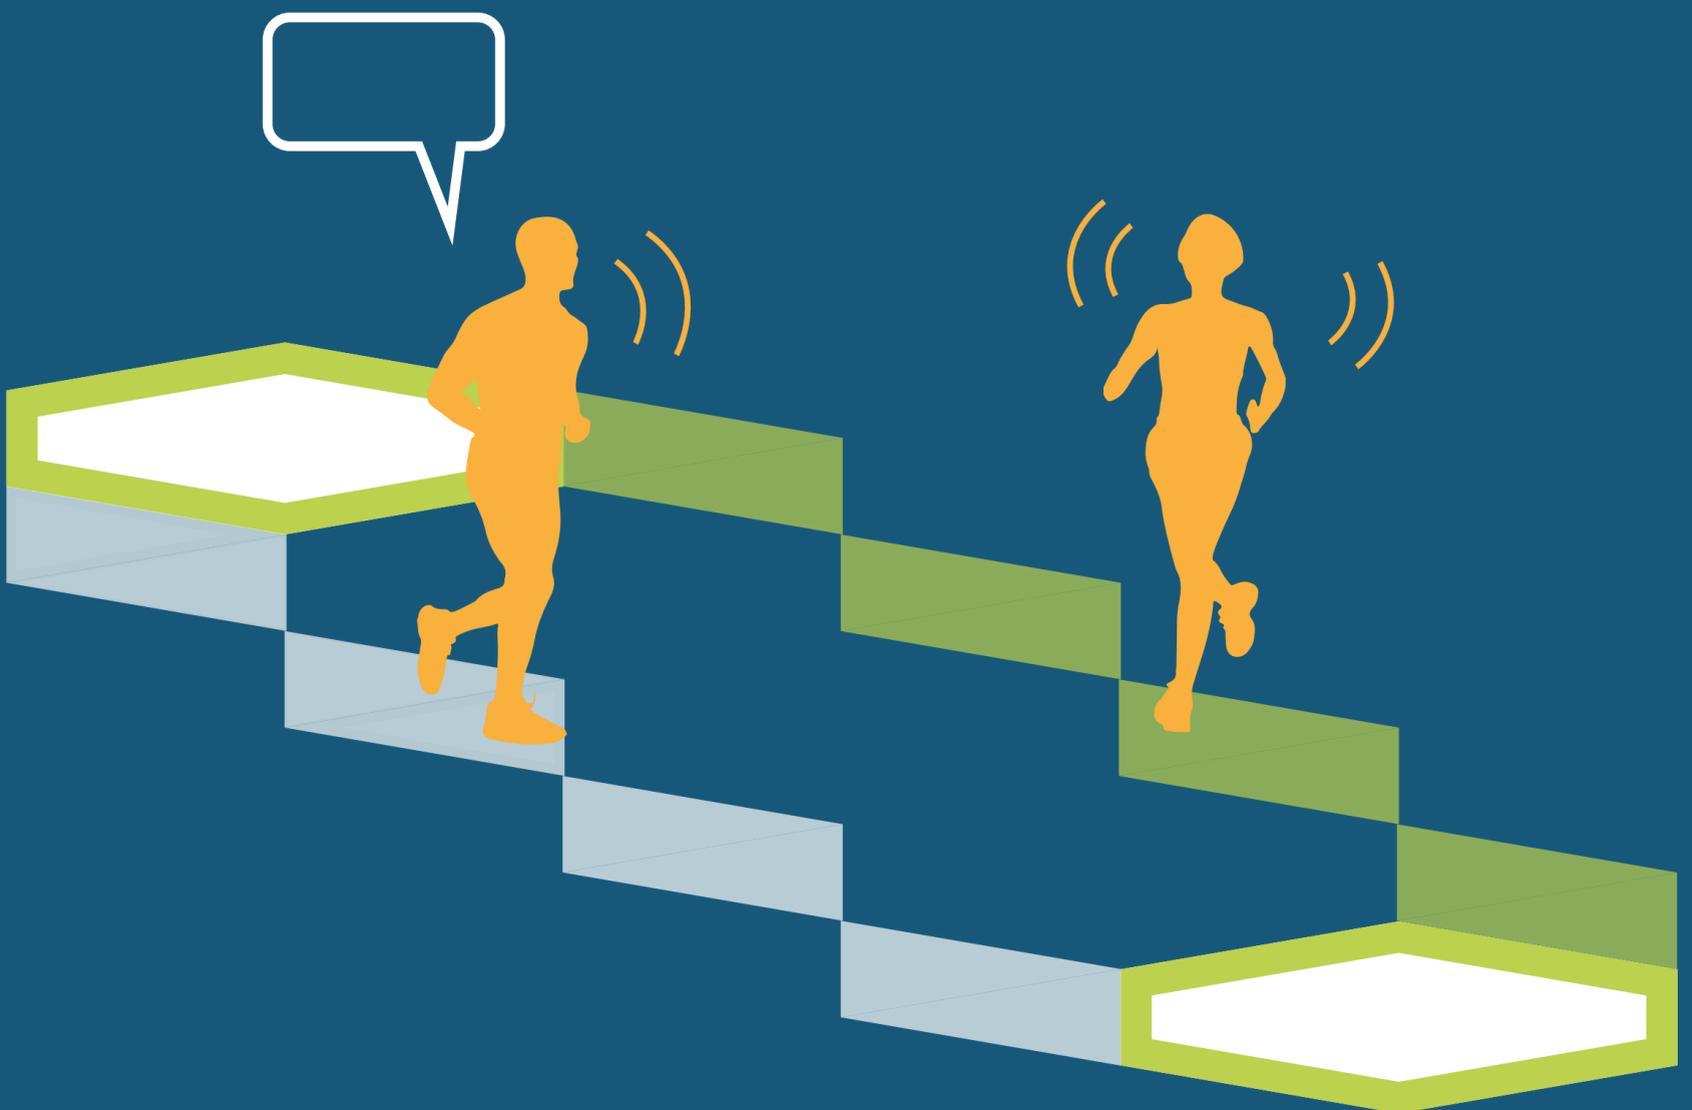

step 05

on the way there, tell them about yourself: in every house you land, there will be a theme written on the floor. say something about it!

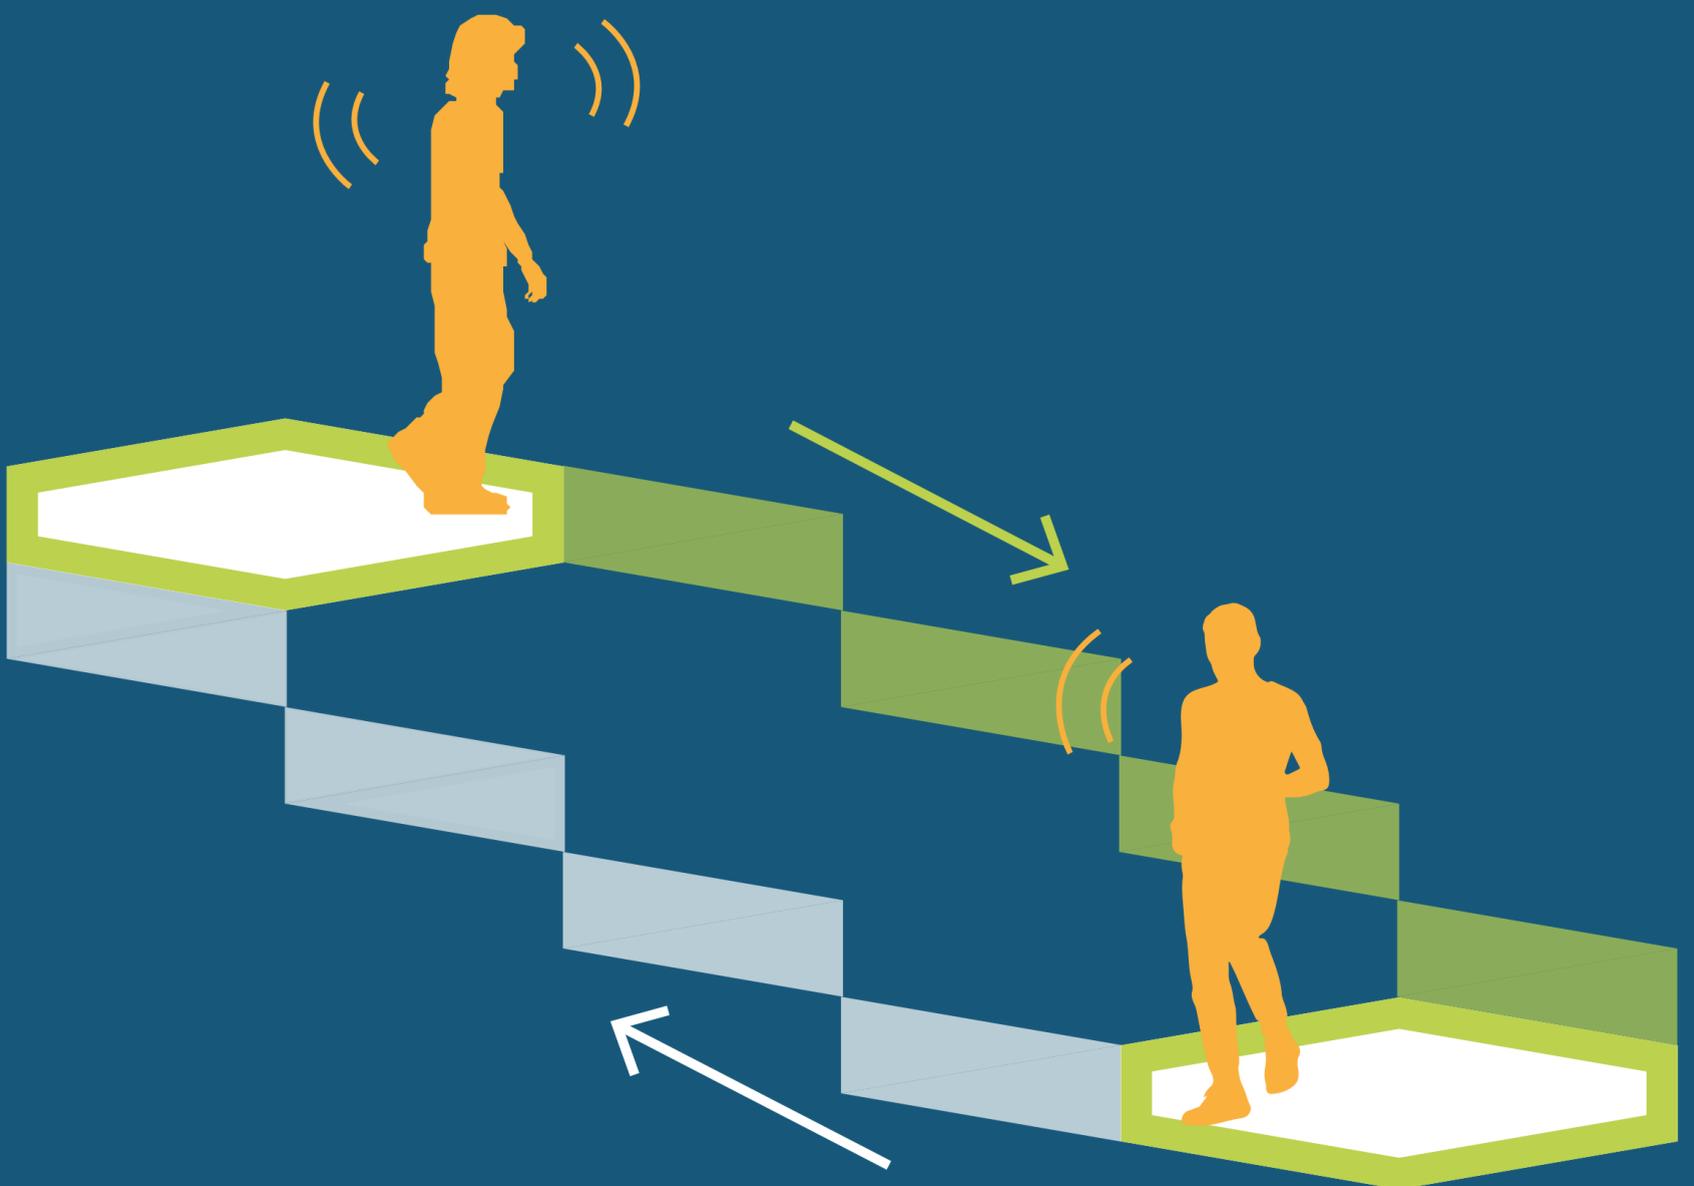

step 06

listen closely: be attentive to hear what the other person is going to tell you!

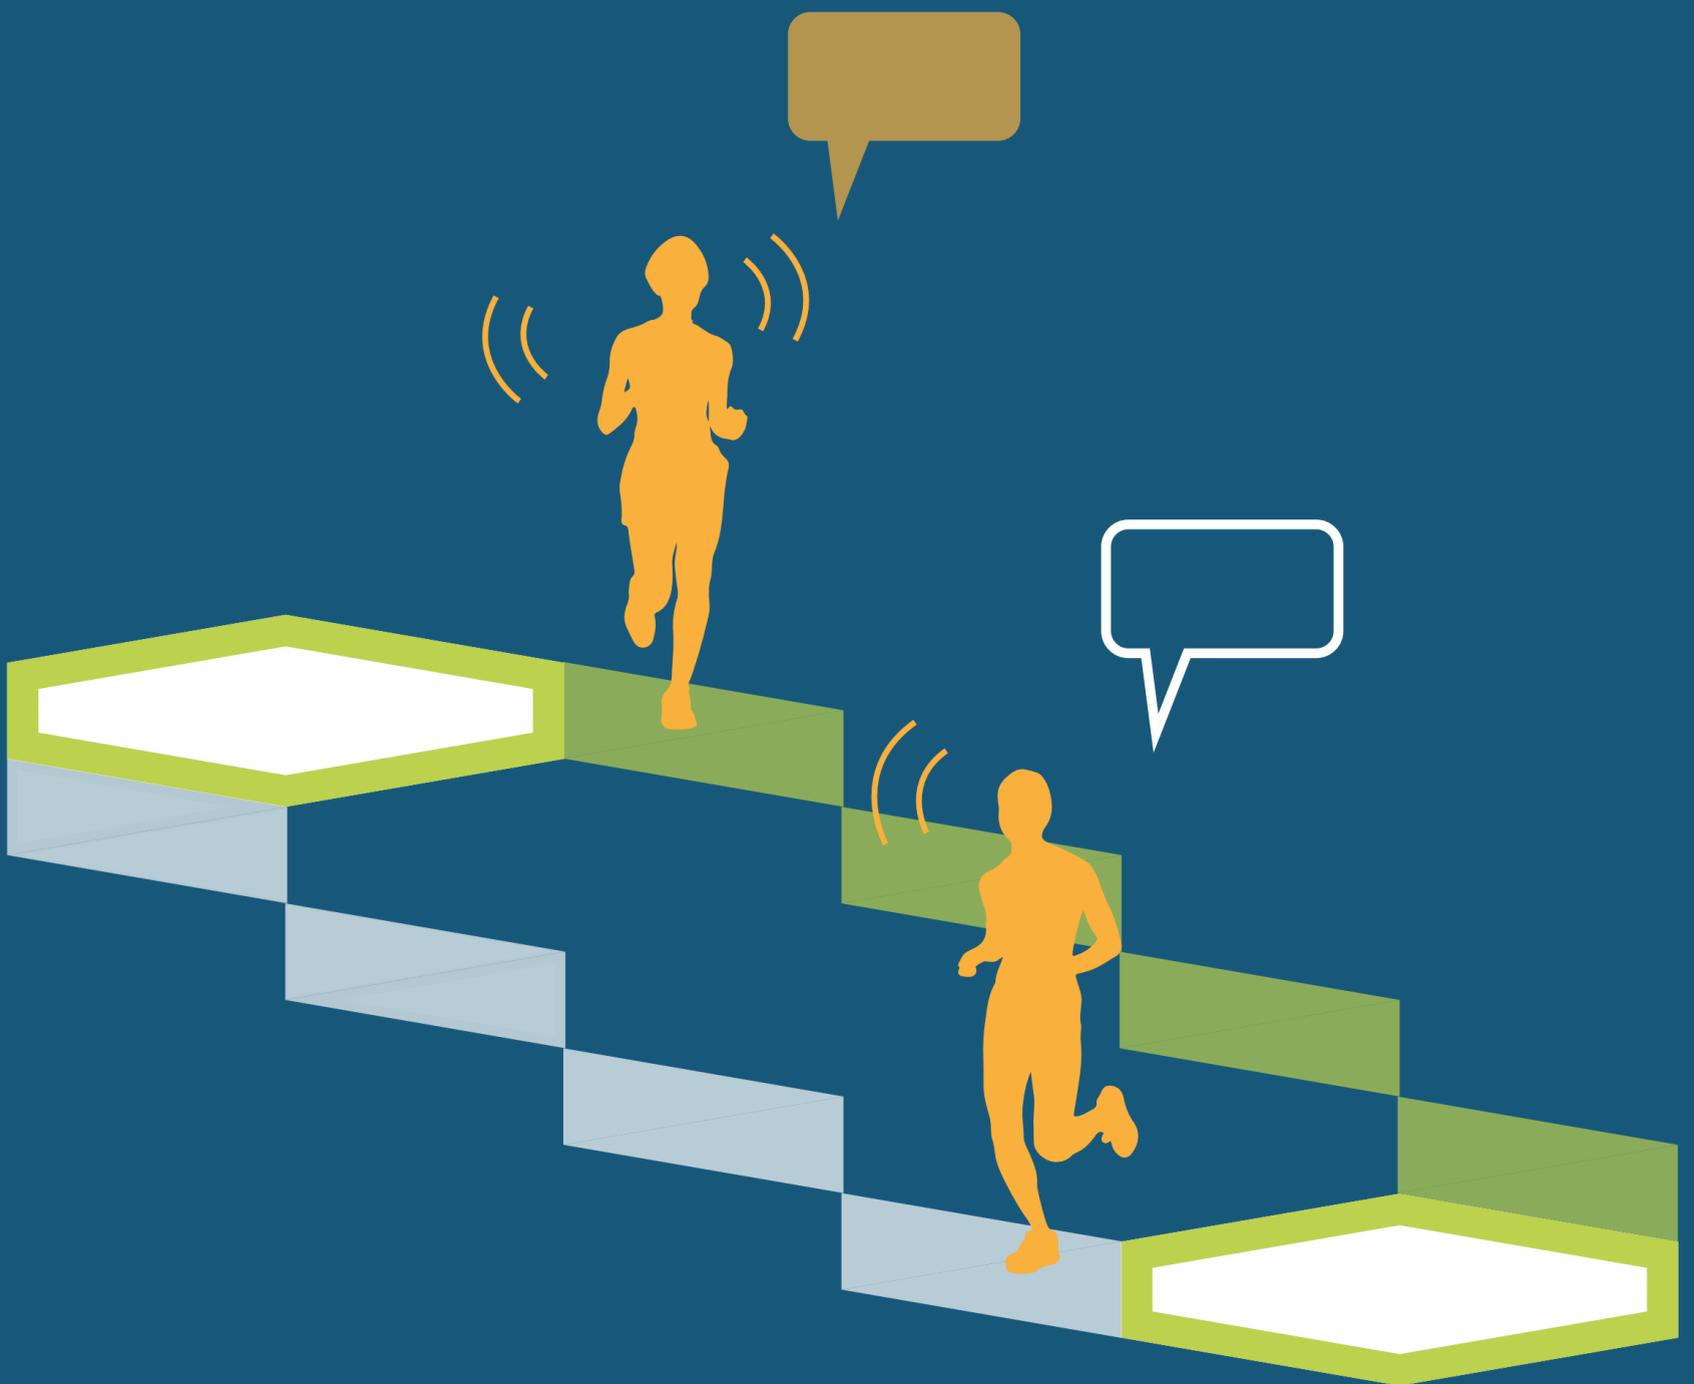

step 07

when you get to the other end,
get ready: now it's time to go
back the same way as YOU.
meaning, as the other person.

step 08

in the application, you can draw what actions you should do on the way back. now you will go through the houses saying what the other person told you.

step 09

the round ends when both players return to their starting superhouses. you can play more rounds with different themes to get to know each other more and more.

now you know all the steps! let's play?
